

EcoHac[®]

Economically Eco-friendly

Nature & Food

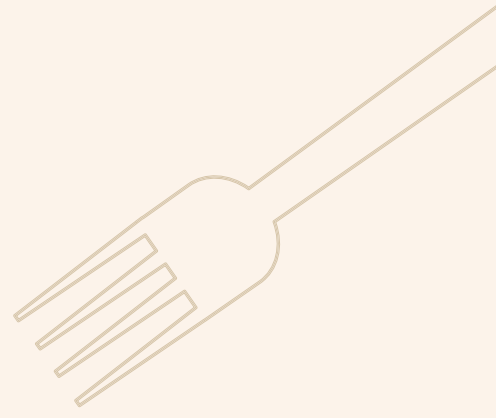

Packaging Go Hand in Hand

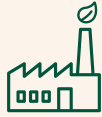

ABOUT ECOHAC

EcoHac is committed to offering smart food-serving solutions in a sustainable manner. Our products are designed in such a way that every food packaging solution is eco-friendly. It is the most effective way to safeguard your food from potentially harmful and unhealthy substances.

Food containers, one-use plates, and a variety of dining utensils with impermeable and flexible storage components make them a viable option for easy food packing.

Packaging Made From Plants

Responsibly Sourced & Manufactured

Certified Compostable

100% Carbon Neutral

Raw Materials Derived From Plants

EcoHac manufactures all of its food packaging products from natural, plant-based resources, resulting in materials that are both sustainable and renewable. These components have a small environmental imprint as compared to standard polymers, which are sourced from fossil fuels.

A Moral Distribution Network

We give high importance to fair pricing in our supplier networks, which results in economical pricing for our product range, making EcoHac the preferred choice for everyone. Hotels, Restaurants, Cafes, Eateries, Cloud Kitchens, Home Bakers, Niche Chefs & Home-grown Food Ventures, and a vast variety of other end-users benefit tremendously from our product range and promote it.

Sustainably Sourced Paper

Sugarcane Bagasse

Sustainable Solutions

Food take-away packaging allows for complete utilisation of cooked foods while preventing waste from crowding garbage dumps, thereby dismissing our product's carbon emissions. The ability to dispose of our product directly into the compost bin alongside other kitchen waste facilitates convenience while promoting a nature-friendly habit and providing the by-product of nutrient-rich compost.

We, at EcoHac, feel proud to provide dependable and environmentally friendly solutions
